Explanations	

Our company has signed a contract worth a total of €19,415,645.00 with a client located in the African continent. The contract covers the engineering, protection, control, and automation infrastructure renewal of five 220kV substation centers, each located in a different region.

The project is of great significance in terms of renewing the country's energy infrastructure and increasing energy supply reliability. Once completed, the aim is to provide uninterrupted and sustainable energy to approximately 1,000,000 people.

The success of this project should be considered as part of our company's strategy to become a strong player in emerging new markets.

We present this to the public's information.

Turkish and English translations of this statement are available, and in case of any conflict between the Turkish and English versions of this statement, the Turkish version will prevail.
